

Quick Guide of Matching Mamibot Exvac660 with Amazon Echo Smart Devices

Preparation:

- 1) Wi-fi network that can connect to Amazon services;
- 2) A device of Echo, e.g., **Amazon Echo, Echo Tap or Echo Dot**;
- 3) **Registered ID of Amazon**, if you have not registered Amazon ID, please go to www.amazon.com to register;
- 4) **Smart Device APP**, e.g., **[Weback]** you have not downloaded this APP, please search **[Weback]** from Appstore (for IOS system) or Googleplay (for Android system) to download;
- 5) Register ID of **[Weback]** via email or phone number, please refer to **[Quick Guide for APP Using Weback Version]**. Please only use **[Weback]** APP if you're going to use your Amazon Echo match with your robot vacuum cleaner.

Note: When you add Exvac660 to **[Weback]** APP, please rename your device (robot vacuum cleaner) only in English, for example, "Mamibot".

Download Amazon Alexa App

Search Amazon Alexa  and download.

Setting Up Amazon Alexa

- 1) Connect Amazon Echo devices to power supply, make sure wi-fi network is ready for connection;
- 2) Click Amazon Alexa App  on your phone;
- 3) Input your registered Amazon ID and password, **Sign in [Fig 1]**;
- 4) Choose **Settings [Fig 3]** from **upper left [Fig 2]** of Amazon Alexa App, click **Set Up a New Device [Fig 4]** to add your device;
- 5) Choose your Amazon Echo type **[Fig 5]**;
- 6) Choose the Language **[Fig 6]**;
- 7) Click Connect to Wi-Fi **[Fig 7]**;
- 8) Long Press the small dot **[Fig 8]** on your Echo Device for 5 seconds, until Echo Light turns to **Orange**, click **Continue**;
