Thanks for purchasing Mamibot robot vacuum cleaner. Please read this User Manual carefully before using and keep it properly for future use.

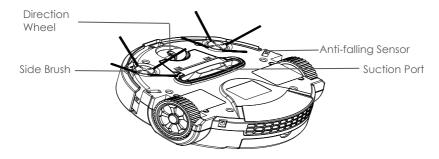

USER MANUAL

To Know Your ProVac Plus

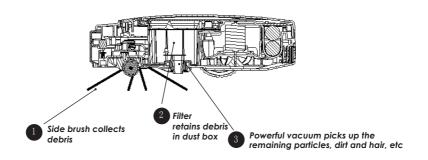

1. Top View

2. Bottom View

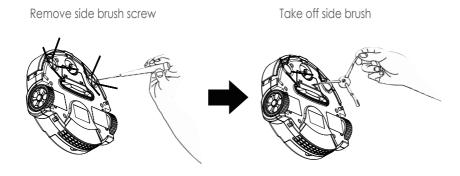

3. Cleaning System

To Maintain Your ProVac Plus

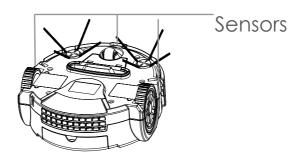

1 Clean or replace the side brush

The side brushes can sometimes be deformed during transportation or when the product is used under particular conditions. If this happens, it is possible to return to the original shape by putting bristles in hot water.

2 Clean Anti-falling sensors

Wipe three anti-falling sensors with a clean, dry cloth.

To Maintain Your ProVac Plus

3 Clean the Dust Bin and Filter

A. Push out the cover and clean filter

To Use Your ProVac Plus

1. Big room cleaning: Press twich (2 times) the Switch On/Off minutes and stops automatially;

2. Small room cleaning: Press Once (1 time) the Switch On/Off button to start, it cleans 30 minutes and stop automatically.

Frequent Asked Questions

Q: Why does the Side Brush occasionally spin backwards? A: When caught on items such as carpet tassels or wires, the Side Brush may spin slowly or briefly spin backwards to free itself. This may also occur on thick or high-pile carpets. If this behavior should occur on hard floor surfaces or when on tassels or wires are presented, the Side Brush should be cleaned. Using a small screwdriver, to move the screw from the center of the Side Brush first, then remove the Side Brush and clean any hair or debris wrapped

around the shaft thoroughly. Re-install the Side Brush properly after cleaning it.

Q:Why does ProVac Plus accasionally make a squeaky sound?

A: When its brushes encounter items such as carpet tassels or wires, the brushes will briefly reverse direction to get free. This action causes a squeaky sound that can be heard approximately once per second until the brushes are free from obstruction. If your ProVac Plus makes such a sound when no tassels or wires are presented, the main brush/side brush should be cleaned.

Q: Why doesn't ProVac Plus slow down as it approaches certain obstacles? A: The ProVac Plus uses its light Touch Bumper technology to identify walls and other obstacles, allowing it to slow down and gently touch the obstacles with its bumper before changing direction. It may be less effective at sensing and slowing down from extremly dark or black surfaces, or for objects that are less than two inches wide.

Cleans Multiple Floors

- The ProVac Plus works on wood, carpet, tile, vinyl, and linoleum, and adjusts automatically to different floor types.
- The ProVac Plus automatically senses stairs and other cliffs. It might stall when confronting rounded edges and might slide over particularly slippery surfaces.

Anti-Tangle System

The ProVac Plus won't get stuck on cords, carpet fringe or tassels. When it detects that it had picked up a cord or tassel, it will automatically stop its main brushes or side brush and try to escape. It may make a clicking noise when anti-tangle is activated.

Important Safety Instructions

- ▶ This appliance should only be used for domestic cleaning, as described in this user guide.
- ▶ Always switch off and remove the charger from the socket before cleaning the appliance or any maintenance task.
- ▶ This Appliance can be used by children aged from 16 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.
